

TECHNICAL EXPERIENCE

Personal ReactJS Projects

Vietnam Food Map: <https://foodmap.phunh.com/>

- Built a mobile responsive website for users to share favorite eating places in Vietnam
- Features:
 - Add, edit, rate and leave comments on multiple places
 - Filter places base on types or address (city/district)
 - Display a custom styled Google map with multiple interactive markers base on places' address
 - Authentication: Log in and sign up with confirmation sent to user email
 - Store data with Firebase Realtime Database REST API
- Technologies used:
 - React functional component, hooks & custom hooks, React Router, Redux/Redux Toolkit, HTML & CSS
 - Firebase Auth REST API, Firebase Realtime Database API, Maps Javascript API, Places API, Geocoding API

To-do List: <https://todolist.phunh.com/>

- Built a mobile responsive website to create to-do lists by unique names
- Features:
 - Create or get list with a unique case-sensitive name on a modal
 - Add, remove, edit or change state of to-do items
- Technologies used:
 - React functional component, hooks, context API, React Icons, Typescript, HTML & CSS
 - Axios, Firebase Realtime Database API

Personal Website: <https://phunh.com/>

- Built a mobile responsive website to showcase personal skills, portfolio and contact information
- Technologies used:
 - React functional component, hooks & custom hooks, Typescript, HTML & CSS
